ANNU

Software Engineer | Java Full Stack | MERN Stack | REST APIs | Backend Development
akshitmudgal001@gmail.com | +91-8506850066 | Chandigarh, India | linkedin.com/in/annumudgal001 | github.com/annumudgal001

PROFESSIONAL SUMMARY

MCA graduate (GPA: 7.82) with proven industry experience at Infosys in Java Full Stack development, RESTful API design, and automation testing. Built 36+ GitHub repositories spanning real-time systems (Web Sockets), AI-integrated applications, and full-stack MERN projects. Proficient in Data Structures & Algorithms, OOP, DBMS, and Agile SDLC. Seeking entry-level SDE, Full Stack Developer, or Backend Developer role.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), Python
Frontend: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, EJS, Responsive Design
Backend: Node.js, Express.js, REST API Design, Web Sockets, Socket.io, Spring Boot (exposure)
Databases: MongoDB, MySQL, SQL Query Optimization, Schema Design, Indexing, DBMS
Testing/Tools: Automation Testing, Selenium, JUnit, Git, GitHub, Postman, Linux, Docker (basic), Agile/Scrum
CS Core: Data Structures & Algorithms, OOP, SOLID Principles, OS, Computer Networks, SDLC

PROFESSIONAL EXPERIENCE

Software Developer Intern · Infosys Limited · Chandigarh *Jul 2025 – Present*

- Engineered production-grade RESTful APIs in Java for an eCommerce POC — product catalog, user authentication, cart management, and order lifecycle — following MVC architecture and service-repository design patterns with SOLID principles.
- Developed and executed automated regression test suites using Selenium and JUnit across 10+ critical user flows, reducing manual QA cycle time and increasing defect detection coverage in Agile sprints.
- Optimized SQL queries and relational database schemas for high-volume concurrent operations; contributed to service layer and request-handling architecture decisions in cross-functional sprint reviews.
- Maintained Git/GitHub version-controlled codebase via code reviews and daily standups; consistently shipped features within sprint deadlines across Agile delivery cycles.

Apprentice Web Developer · Yoma Technologies (BYLD Group) *Jan 2025 – Jun 2025*

- Architected and shipped 3+ full-stack MERN applications (MongoDB, Express.js, React.js, Node.js) featuring JWT-based authentication, role-based access control, and RESTful API integration.
- Optimized MongoDB queries using indexing strategies and Express.js middleware pipelines, improving backend API response time and overall application throughput.
- Delivered zero-defect features across bi-weekly Agile sprints; managed codebase via Git/GitHub with PR reviews and continuous integration practices.

PROJECTS

eCommerce Platform (POC) — Java Full Stack *Java · REST APIs · Spring MVC · SQL · Selenium · JUnit · Agile | Infosys*

- Architected and implemented core backend services for a full-stack eCommerce application — product catalog, cart management, user authentication, order lifecycle, and payment modules — using Java with MVC architecture, service-repository design patterns, and SOLID principles.
- Designed and consumed RESTful APIs across all major modules; built and executed 10+ automated regression test cases using Selenium and JUnit, improving defect detection coverage and cutting manual QA effort per sprint.
- Optimized relational database schemas and SQL queries for concurrent read/write operations; contributed to service layer architecture decisions and participated in Agile sprint planning, code reviews, and retrospectives.

Personal Portfolio Website — Live Node.js *· Express.js · EJS · Tailwind CSS · REST APIs · Render*

- Engineered a production-deployed multi-page full-stack web application with dynamic server-side routing, EJS templating, and a RESTful contact form endpoint — built on an Express.js backend with middleware for request logging, input validation, and error handling.
- Implemented mobile-first responsive UI using Tailwind CSS across multiple routes; optimized static asset serving and Express.js request pipeline, achieving consistent fast page load performance on Render cloud deployment.
- Structured codebase following MVC separation of concerns with clean route architecture, environment-variable configuration, and Git/GitHub version control — demonstrating production-grade Node.js full-stack development practices.

EDUCATION

Master of Computer Applications (MCA) *2023 – 2025*
K.R. Mangalam University | GPA: 7.82 / 10
***Coursework**: Advanced Web Development, DBMS, Machine Learning, AI, Cloud Computing, Data Structures & Algorithms*

Certifications

- **Java Professional Certificate** — Infosys Springboard
- **Developing Back-End Apps with Node.js and Express**— Coursera
